

Wind Industry Recommendations to EIPC

- **Generator sector**
 - Limit to non-transmission owning generators
- **SSC seat already set-aside for renewables in generator sector**
 - AWEA request: Allow this reserved slot to be selected by renewable participants only on an interconnection wide basis
 - Seat reserved for non-renewable generator can be selected via method of their choosing
 - Non-reserved seat to be awarded via vote of generator caucus members selected through regional process proposed by EIPC

Wind Industry Recommendations to EIPC

- **Reserve generator caucus seats as follows:**
 - 1/3rd reserved for renewables, selected regionally as proposed by EIPC
 - If a region is unable to fill allotted renewable seats, they are re-allocated to region that is oversubscribed for renewables or filled on an interconnection wide basis with renewable participants
 - 1/3rd reserved for other generators, same process
 - 1/3rd decided via regional votes of all participants in generation sector
