

Off-Shore Wind Sensitivity/ies

- Total 20 GW
 - 19.5 GW in Atlantic
 - 0.5 GW in Great Lakes

Offshore Wind Sensitivities

Offshore Wind Sensitivities

(EISPC) Future 7 Sensitivity - Small Modular Reactor

- Change size from 600 MW down to 120 MW
- Capital cost same as large scale nuclear
- Aggressive implementation start after 2020
 - Construction lead time 7 years
 - Learning rate at 15%
